---

## EDUCATION:

*Anghel Saligny Technological High School - Mechatronics, Robotics, and Automation Engineering*

## WORK EXPERIENCE:

*April 2023 - present: Software developer*

- Specialized in crafting dynamic web applications using **Next.js** and **React.js**.
- Utilized **Git CLI**, **Cypress**, and **SQL** for project management.
- I contributed to enhancing application robustness, **user experience**, and security.
- Designed a dedicated component to manage unauthorized access.
- Introduced new functionalities to the homepage, optimizing **user interface**.
- Orchestrated a seamless redirection feature for prospect creation.
- Developed strong **project management**, **problem-solving**, and **communication**

**skills** through **team collaboration**.

*October 2016 - present: Package courier*

- I've honed my **organizational skills** and maintained high efficiency in delivering packages on time and in good condition.
- **Consistently**, customers have praised my **friendly** and **professional demeanor**.
- I've contributed to the company's success by implementing new processes to **streamline** delivery, resulting in increased productivity and customer satisfaction.
- I've led a team of junior couriers, managing and **training** them effectively.
- Thanks to my **exceptional performance**, I've been recognized as the **courier of the month** five times.

## PROJECTS:

*CryptoCurrency Price Chart* [GeorgeMocanu23/CryptoCurrency-Price-Chart](https://github.com/GeorgeMocanu23/CryptoCurrency-Price-Chart):

- Built with **React.js**, this app displays cryptocurrency price history on interactive charts, enabling users to select currencies and timeframes. It highlights my expertise in **Front-End Development**, **API Integration**, **Interactive Charts**, **Data Manipulation**, and **Responsive Design**.

• Here you can see the history of your favorite cryptocurrency → [stackblitz-starters-b58jwz.stackblitz.io](https://stackblitz-starters-b58jwz.stackblitz.io)

*Snake Game* [GeorgeMocanu23/Snake-Game](https://github.com/GeorgeMocanu23/Snake-Game):

- This is a classic Snake Game made in **HTML** and **JavaScript**, utilizing the power of the **Canvas** element. In this game, you'll navigate a "snake" around the game board to gather as many apples as possible. Your goal is to avoid collisions with both the walls of the board and your own body while challenging yourself to achieve the highest score.

• Here can you have some fun → <https://js-fadmd3.stackblitz.io>

For more projects, feel free to explore my GitHub profile located at the top left corner of the page. Thank you for your time!
