EDUCATION:

June 2022 - March 2023: WellCode - Mentorship Program

● I acquired a robust foundation in coding, **learning algorithms**, **data structures** (150+ **problems solved**), and delving into **Object-Oriented Programming** using languages like **C++**, **Java** and **Javascript**.

● The experience extended beyond theory, actively contributing, honing my practical **application skills**. The program emphasized **effective communication** within a collaborative setting, fostering a **growth mindset**. The successful completion of the program is attested by the conferred diploma, validating my advanced programming proficiency.

WORK EXPERIENCE:

April 2023 - present: WellCode - Software developer

● **Contributed** to crafting a custom CRM for sales and coaching teams with **Next.js** and **React.js**.

● Enhanced **security**, **user experience**, and **robustness** with advanced features, including **unauthorized access management**.

● **Optimized** CRM homepage, improving **user interface** and overall **experience**.

● **Streamlined** workflow by **integrating a redirection feature** for prospect creation.

● Employed a tech stack: **Git CLI** for version control, **Cypress** for testing, and **SQL** for database management.

October 2016 - present: DPD - Package courier

● I've honed my **organizational skills** and maintained high efficiency in delivering packages on time and in good condition.

● **Consistently**, over 90% of customers have praised my **friendly** and **professional demeanor**.

● I've provided **training** and **guidance** for 7 junior couriers, guiding them step by step within our team.

● Thanks to my **exceptional performance**, I've been recognized as the **courier of the month 5 times**.

PROJECTS:

Next.js-Blog, https://george-mocanu.vercel.app

● My primary project is a real-time web application. I implemented functions to enhance the user experience, incorporating modern graphics. The project seamlessly integrates an extensive **content management system**, allowing me to showcase my created projects.

● This involves the ability to create detailed entries for new projects, edit personal information in the 'About Me' section, and present a dynamic CV. Additionally, the platform includes a secure **authentication system**, enabling users to log in or create a new account. Moreover, the platform features a robust system for **comments and ratings**, where all users can post, and only message owners can edit or delete their posted messages, offering an intuitive interface.

● Tech Stack: Next.js, React, Prisma, NextAuth, PostgreSQL, Material UI
